AUSTIN, Texas, May 1, 1894.

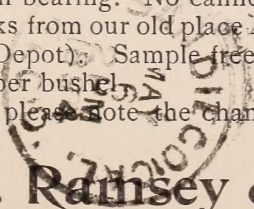

REMOVAL. After thirty-four years experience in fruit and tree culture at Mahomet, Burnet county, twenty of which have been devoted entirely to Nursery work, our business has grown until we have been compelled to locate at a better shipping point. Two years ago we bought a splendid location here and commenced planting, and now we are permanently located, and have a nice, thrifty lot of general nursery stock growing. The orchards on our old place are retained for buds and grafts.

BUDS. We introduced the Wooten Plum and Cluster Apricot, and are going to introduce the Elberta Cling. It is from a seed of Chinese Cling, large, rich yellow color, sure bearer, best shipper, ripens last of July. It will take the market. Buds in season \$4.00 per 100. This makes six successive crops for Cluster. It is fuller this year than half of our peach trees. Buds \$3.00 per 100. 60 buds of each and some Wooten Plums for \$5.00.

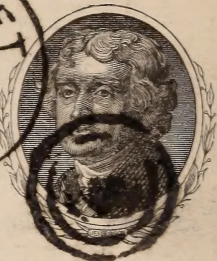

PEACH SEED, Best on Earth. We collected a surplus of a few hundred bushels last year, and have some to spare. Nearly all are from seedling trees, very small, and always come up. No disease here of any kind. There are seedling peach trees here from 30 to 46 years old still bearing. No cannery seed. We ship in strong sacks from our old place 45 miles north of here (Bertram Depot). Sample free. Price until June 15th, \$2.00 per bushel.
